

DATA ANALYSIS & VISUALIZATION

COURSE OVERVIEW

In this comprehensive training program, we will equip you with the essential skills and knowledge required to effectively analyze and interpret data. Whether you're a beginner looking to enter the field of data analysis or an experienced professional seeking to enhance your data-driven decision-making abilities, this course will provide you with a solid foundation.

Whether you're a beginner looking to enter the field of data analysis or an experienced professional seeking to enhance your data-driven decision-making abilities, this course will provide you with a solid foundation.

LEARNING OBJECTIVES

- ✓ Understand the fundamentals of data analysis and visualization
- ✓ Enhance data storytelling abilities
- ✓ Develop critical thinking and problem-solving skills
- ✓ Learn data analysis techniques
- ✓ Gain proficiency in data cleaning and preprocessing
- ✓ Understand ethical considerations in data analysis and visualization

Participants are required to bring their personal laptops for an enriched learning experience. Or the organization should provide tablets to ensure every participant has the necessary tools for the course.
